

Assignment 01: Flutter Mobile App Design (User Portfolio)

I. Overview

In this assignment, students will develop a personal portfolio mobile app using Flutter, following a this provided [Figma design sample](#). This app will showcase their profile, skills, and work, serving as a professional portfolio piece.

II. Assignment Requirements

1. Use the Provided Figma Design
 - Students must follow the given Figma design as a reference (You are open to customize your own color or based on your creativity)
 - They must replace the placeholders with their own image, name, role, and details.
2. Essential Features
 - Profile Section: Display the student's photo, name, and profession (e.g., Mobile Developer, UI/UX Designer).
 - Introduction/Bio: A short description of their skills or background.
 - Buttons:
 - "Hire Me" or Contact button (can link to email or social media).
 - "Download CV" button (should link to their actual LinkedIn).

III. Submission Guidelines

- Students must upload their Flutter project to GitHub and submit the GitHub repository link in text file named **[Your Name]_Assignment01.txt**
- The repository should include:
 - A README.md file with a brief description of the app.
 - Screenshots or a demo video of the app.
 - The full Flutter project, including all necessary files.
- Ensure the app is functional and bug-free before submission.
